

Implement Traffic Management Student

In this lab,

- Task 1: Provision the lab environment
- Task 2: Configure the hub and spoke network topology
- Task 3: Test transitivity of virtual network peering
- Task 4: Configure routing in the hub and spoke topology
- Task 5: Implement Azure Load Balancer
- Task 6: Implement Azure Application Gateway

Task 1: Provision the lab environment

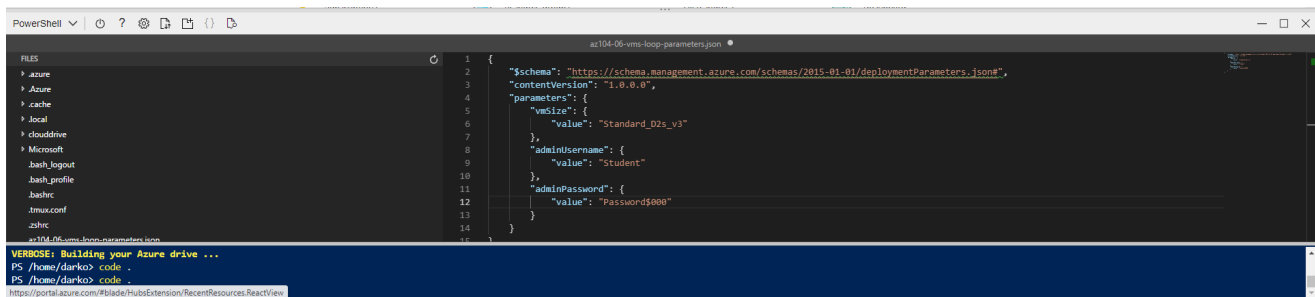

Login to portal.azure. Open powershell and upload two files

File 1: \Allfiles\Labs\06\az104-06-vms-loop-template.json

File 2: \Allfiles\Labs\06\az104-06-vms-loop-template.json

After we upload the scripts, we have to edit the login credentials.

From the powershell run this command to create three virtual networks and four Azure VMs from files we uploaded.

```
New-AzResourceGroupDeployment `
-ResourceGroupName $rgName `
-TemplateFile $HOME/az104-06-vms-loop-template.json `
-TemplateParameterFile $HOME/az104-06-vms-loop-parameters.json
```

Success!!! We created new VM

Home >

az104-06-vm1	Virtual machine	Azure Pass - Sponsorship	az104-06-rg1	West Europe	Running	Windows	Standard_D2s_v3	-	1
az104-06-vm2	Virtual machine	Azure Pass - Sponsorship	az104-06-rg1	West Europe	Running	Windows	Standard_D2s_v3	-	1
az104-06-vm3	Virtual machine	Azure Pass - Sponsorship	az104-06-rg1	West Europe	Running	Windows	Standard_D2s_v3	-	1

< Previous Page 1 of 1 Next >

Give feedback

```

PowerShell
PS /home/darko> New-AzResourceGroupDeployment `
>> -ResourceGroupName $rgName `
>> -TemplateFile $HOME/az104-06-vm-loop-template.json `
>> -TemplateParameterFile $HOME/az104-06-vm-loop-parameters.json

DeploymentName      : az104-06-vm-loop-template
ResourceGroupName   : az104-06-rg1
ProvisioningState    : Succeeded
Timestamp           : 3/23/2023 10:01:12 AM
Mode                : Incremental
TemplateLink         :
Parameters
  Name      Type      Value
  -----
  vmSize    String    "Standard_D2s_v3"
  vmName    String    "az104-06-vm"
  vmCount   Int       4
  adminUsername String   "Student"
  adminPassword SecureString null

Outputs
  
```

Now we have to create Network Watcher extension on the Azure, for the vm we created in previous step. Run this command in powershell

Success!!! We created new network watche for every VM
